

Our customers benefit from the proactive nature of the Steelhead WAN Optimization Assessment and Design Service, gaining insight into their new Riverbed WAN optimization deployment.

## Riverbed® Steelhead® WAN Optimization Assessment and Design

### Be Prepared for Your Steelhead Deployment!

The Riverbed Steelhead WAN Optimization Assessment and Design Service is a Riverbed Professional Services offering developed to review your environment and design a custom WAN Optimization solution architecture. The Assessment and Design Service is the first step to ensuring your Riverbed WAN optimization solution is deployed according to best practices.

#### Benefits

- Ensures that best practices are followed in the deployment of your Riverbed Steelhead infrastructure
- Helps mitigate potential network issues and plan for their resolution
- Leverages the experience of our consultants to trust that your implementation plan is the best possible plan

#### Deliverables

The Assessment and Design Service includes:

- Review and documentation of current network infrastructure components (utilizing existing network topology information)
- Measurement of the amount and type of LAN/WAN traffic in the current network infrastructure
- Documentation of homegrown or specialized application protocols that will require optimization over the WAN
- Highlighting of sites that will require custom rule development for the Riverbed Steelhead
- Creation and delivery of a detailed architecture design for the Riverbed Steelhead solution in the customer environment including:
  - ▶ In-path Steelhead appliance deployment locations
  - ▶ Out-out-path Steelhead appliance deployment locations
  - ▶ Central Management Console deployment location (if applicable)
  - ▶ Interceptor appliance deployment locations (if applicable)
  - ▶ WCCP or PBR considerations

#### About Riverbed

Riverbed Technology is the IT infrastructure performance company. The Riverbed family of wide area network (WAN) optimization solutions liberates businesses from common IT constraints by increasing application performance, enabling consolidation, and providing enterprise-wide network and application visibility – all while eliminating the need to increase bandwidth, storage or servers. Thousands of companies with distributed operations use Riverbed to make their IT infrastructure faster, less expensive and more responsive.
